

## Modernising day time opportunities

? How are people with high support needs and their families being involved in plans for day service modernisation?

? You will have been finding out what people want to do. How are you using this to decide what new choices there will be?

? How many people with high support needs use day services as their main activity in the week?

? How many people get a day service part time?

? What are your plans to help them have more to do for the rest of the week if they or their families need this?

? Are you clear that your plans for changing day services do not 'leave behind' people with the most needs, still in the day centres that are left?

? What sort of chances are there for people with high support needs to use facilities in the community?

? Do you have projects that are about people with high support needs doing things in the community?

? How many people are excluded from services because they are seen as too challenging or too complex for services?
